PROFESSIONAL SUMMARY

I am a FullStack Developer with previous experience in logistics and procurement, which has enhanced my skills in teamwork, large-scale data analysis, and rapid decision-making with a business focus. I am specialized in Front-end and Back-end development, with proficiency in agile methodologies, GIT, data structures, algorithms, and CSS frameworks. Currently expanding my knowledge in Python to complement my expertise. I also have experience with GraphQL, C#, and .NET, which allows me to deliver robust and scalable solutions in development projects. My English level is intermediate/advanced.

PROJECTS

Full Stack Web Developer – Woofer

Final Project at Henry Bootcamp
(December 2023 – January 2024)

Collaborated with six teammates on "Woofer," the final project for the Henry Bootcamp. Contributed to the integration of client communication and Front-end development using JavaScript and Next.js for the HomeWalker feature. Developed the notification system and ensured seamless communication between components.

- **Technologies:**
 - Front-end: JavaScript, Next.js, React, Redux, Firebase
 - Back-end: Node.js, Cloudinary
 - Database: PostgreSQL, Sequelize

[GitHub Repository](#)

Full Stack Web Developer – Videogames

Individual Project at Henry Bootcamp
(November 2023 – December 2023)

Independently developed a task management project demonstrating strong skills in React, Redux, Node.js, and PostgreSQL. Delivered an optimized user experience and

implemented a robust notification system. This project highlights my ability to work autonomously and efficiently.

- **Technologies:**
 - Front-end: JavaScript, React, Redux
 - Back-end: Node.js
 - Database: PostgreSQL, Sequelize
